

How to set up an affiliate program on Shopify (Rekomi) — v2

[HOOK 0:00]

[ON SCREEN: talking head]

Imagine this for a second. The same Shopify store you've got now, the same products. But this time, other people are selling them for you, in exchange for just a small commission on every sale they make.

[B-ROLL: quick montage, one cut per name]

And there are loads of people who'd happily do it. Influencers, TikTokers, YouTubers, bloggers, podcasters, newsletter writers, mums at home, students, and your own happy customers.

[ON SCREEN: talking head]

You don't need a bigger audience. You need someone else's.

Here's how to set up an affiliate program on Shopify that makes that happen, with an app called Rekomi.

[THE CLEVER BIT]

[ON SCREEN: talking head, punch-in]

Now here's the clever bit, and one of the big reasons Rekomi can get you more sales: it takes the friction out.

A link's great in a bio or a blog post. But nobody reads a link out loud in a TikTok, and nobody texts one to their mum.

[ON SCREEN: text pop, "WICK15"]

So every affiliate gets their own real discount code as well. Short, easy to remember, easy to say. Their friend just types it in at checkout, and the sale still counts.

[B-ROLL: two mums chatting over coffee, a lit candle on the table]

So picture a mum getting asked, "Where did you get that candle? It smells amazing."

And she says, "Oh, Wickline. I've been buying them for ages. Hang on, I've a code somewhere."

[B-ROLL: friend typing the code at checkout]

Her friend saves a bit and she earns her commission. Nobody clicked a link, and it never once sounded like selling.

[THE TEASE]

[ON SCREEN: talking head, punch-in]

And the code's only the start. By the end of this video you'll see what happens when a customer asks for a refund, when someone tries to game the system, and when it's time to pay an affiliate on the other side of the world, tax forms and all.

Let's build it.

[INSTALL]

[ON SCREEN: apps.shopify.com/rekomi, Install, app opens inside the Shopify admin]

Rekomi's on the Shopify App Store. Install it, and it opens right inside your Shopify admin.

[TEXT POP: 14-day free trial · billed through Shopify]

There's a 14-day free trial, and billing runs through Shopify, so there's no second payment system to set up.

[ON SCREEN: Home, setup guide]

The setup guide is two steps. And tracking's already on. Every order gets matched to the right affiliate, on every payment method your store accepts, with no code to add.

[CAMPAIGN]

[ON SCREEN: Campaigns > New campaign, quick cut per field]

First, a campaign. That's the deal you're offering your affiliates.

What are you paying for? Sales, leads, clicks, or any mix. For a candle shop, sales.

Commission: a percentage, or a flat amount.

How long a click counts. The default's 60 days. Someone clicks today, buys next month, the affiliate still gets paid.

First click or last click. Last click's the standard: whoever sent them most recently gets the sale.

Auto-approve applicants or review them yourself, and pick which countries can join.

[ON SCREEN: Show more options, minimum payout]

And under Show more options, a minimum payout, so you're not sending anyone forty cents.

[RE-HOOK → COMMISSION]

[ON SCREEN: talking head, punch-in]

That's the basics. Now the part that makes your best affiliates push harder.

[ON SCREEN: Commission tab, adding a performance tier]

Performance tiers. Set a revenue target, and when an affiliate hits it, their rate goes up automatically.

[ON SCREEN: per-product rates, gift set rate raised]

Your catalogue syncs in too, so you can set rates per product. Gift sets make you more money than a single candle? Pay more on gift sets.

[CODES + LINKS]

[ON SCREEN: Coupon codes, creating a code for one affiliate]

Remember the mum with the code? This is where that code comes from.

Rekomi creates a real Shopify discount code for every affiliate. Percentage or amount off, cap how many times it's used, give it an expiry, or limit it to certain products.

[ON SCREEN: Shopify admin > Discounts, the code listed]

Jump into your Shopify discounts, and there it is, like any other code.

[B-ROLL: vertical creator video, "WICK15" overlay]

Anyone uses it at checkout, the affiliate gets the credit, no click needed. That's how creators on TikTok, Instagram and YouTube actually send sales.

[ON SCREEN: Product links]

Links still work too, with first-party tracking on your own store's domain. And affiliates can link straight to one product, so if they're talking about the gift set, people land on the gift set.

[SIGNUP PAGE]

[ON SCREEN: signup page]

Affiliates apply here. It lives at yourstore.rekomi.com, or on your own domain, on every plan.

[ON SCREEN: Edit signup page, then View live]

Edit signup page for your branding, View live to see exactly what applicants see.

[TEXT POP: GA4 · Google Ads · Meta · TikTok · LinkedIn]

Running ads? Drop in your GA4, Google Ads, Meta, TikTok or LinkedIn tags.

[AFFILIATES + GROW]

[ON SCREEN: Affiliates, Invite]

Now let's get affiliates in. Invite by email, one at a time or in bulk.

[ON SCREEN: Grow section]

But start with Grow. It turns your existing customers into affiliates. They've already bought from you, they already like it. That's our candle mum, right there.

[ON SCREEN: application opened, risk summary, Approve]

Applications get approved right here, with a risk summary so you know who you're letting in.

[CONVERSIONS]

[ON SCREEN: Conversions ledger]

Every sale, lead and click lands in Conversions, along with whether it's ready to be paid.

[PAYOFF 1: REFUNDS + FRAUD]

[ON SCREEN: talking head]

Right. Remember the refund, the person gaming the system, and the affiliate on the other side of the world? Refunds first.

[ON SCREEN: refunded order, commission adjusted, zoom]

A customer refunds half their order. Rekomi claws back exactly half the commission, and it shows up here on its own.

[ON SCREEN: click held for review]

And every click is screened as it comes in. VPNs, proxies, bots, clicks coming in way too fast, the same device turning up again and again. Anything suspicious gets held for review instead of paid.

[PAYOFF 2: PAYOUTS]

[ON SCREEN: talking head, punch-in]

Now the finish line. Actually paying everyone.

[ON SCREEN: Payouts, Fund balance, Run payout]

Add money to your balance. Run one payout. Done.

[B-ROLL: world map, pins lighting up]

Every affiliate gets paid in their own country, in over 130 countries, through Stripe, PayPal or bank deposit. No mass-pay file. No chasing bank details.

[PAYOFF 3: TAX FORMS]

[ON SCREEN: affiliate profile, W-9 on file]

And the tax forms. Before their first payout, each affiliate uploads a W-9 or W-8.

[TEXT POP: 1099-NEC issued by Rekomi, not you]

Rekomi is the payer of record, so the year-end 1099-NECs go out under Rekomi's name, not yours. You never collect or file an affiliate tax form.

Your own business taxes are still yours, of course. But the affiliate side is handled.

[PAYOFF 4: SWITCHING]

[ON SCREEN: Migrations screen]

Already on another app? You can move everything across from one screen. Import from UpPromote, GoAffPro, ReferralCandy, Refersion, BixGrow, Shopify Collabs and more. Your affiliates, their links and all their history come across intact.

[PRICING]

[ON SCREEN: rekomi.com/pricing]

Pricing. Starter is 29 dollars a month, Growth 49, Pro 99. Each plus a flat 3% of what you pay out to affiliates.

Starter: one campaign, unlimited affiliates, two team members. Growth: unlimited campaigns, five team members. Pro: unlimited team members.

[TEXT POP: monthly payout guide \$2.5K / \$15K / unlimited · no overage fee]

Each plan has a monthly payout guide, but it's a guide, not a wall. You're never blocked from paying your affiliates, and there's no overage fee.

And the custom domain, coupon codes and sub-affiliate recruiting, where your affiliates bring in affiliates of their own, are on every plan. Even the 29 dollar one.

[CLOSE]

[ON SCREEN: talking head, App Store link on screen]

If people already love what you sell, give them a code.

Rekomi's in the description. Try it free for 14 days.
